

REMI 2.4 PREVIEW

what does **REMI** say? sm

Presented by Jerry Hayes, Vice President

Primary Goals

- Update data and add history year
- Enhance existing features and add new functionality
- Add a few new features

Data Modifications

- Historical Period 2001-2018

Default Regional Controls

- Every new national control will have it's own default regional control that will be a base for alternative national controls
- Fixes issues with 'Percent Change' policy variables

Policy Variable Notifications

- Forecast will notify user if a policy variable is not expected to have an effect on a forecast
 - ▣ Example : Using percent change policy variables when the baseline is 0

Results Enhancements

- ❑ Drag and Drop Pivoting
- ❑ Right-click access to filter options
- ❑ Right-click access to unit options
- ❑ 'Current Pivot' option on chart and table selector
- ❑ Origin and Destination field filtering
- ❑ 'Restore' option to revert to original state
- ❑ Fixed annoying popup hint behavior

Input-Output Table Display

- ❑ Cell coloring to separate sections
- ❑ New stacked bar graph to display columns
- ❑ Hints to explain the meaning of the coefficients
- ❑ Filtering to hide sections or columns
- ❑ Added history years
- ❑ 'Jump to' button?

Custom Results

- Allow custom results for policy variable spreader
- Autofill custom results with Input-Output table coefficients
- Additional changes?
- Custom Dataset for formulas and spreading?

Miscellaneous

- ❑ Standardize save dialogs
- ❑ Allow import and export settings to a file for easier sharing
- ❑ Add custom aggregation option that allows items to be reused in multiple aggregations.
- ❑ Run multiple forecasts tool

Studies

- New feature that can run and compare multiple forecasts
 - ▣ Scoring and ranking
 - ▣ Calculating multipliers
 - ▣ Resilience scenarios
